DETAILED ACTION

1. This Office action for US Patent Application 10/722,854 is in response to communications filed 21 September 2007 and 20 December 2007. Currently, claims 5-8 are pending. Claims 1-4 have been cancelled.

2. The terminal disclaimer filed on 20 December 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 7,298,959 B1 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3. The terminal disclaimer filed on 20 December 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of copending US Patent Application 10/684,276 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

4. Claims 5-8 are allowed.

5. The following is an examiner's statement of reasons for allowance: Claims 5-8 place the present application as co-extensive in scope with parent US Patent 7,298,959. Claims 5-8 are directed to processing MPEG video data encoded within DV-formatted DIF data blocks, the MPEG video data retaining its native format within the DIF blocks. Specifically, the limitations in independent claim 5 of "[inserting] MPEG data in an

MPEG format and including an MPEG header, into payload sections of respective DIF data blocks" and "extracting MPEG data from said respective DIF data blocks" are considered patentably distinct over the prior art. Closest prior art "MPEG-2 video data simulator" (Goswami et al.), cited in the prior non-final rejection, teaches MPEG-2 TS packets encoded within IEEE-1394 isochronous packets, but does not teach encoding the MPEG packets as the payload of DIF data blocks.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,826,181 B1 (Higashida et al.), cited in the prior non-final rejection, teaches inserting DV DIF data into MPEG transport stream packets for transmission over an ATM. US Patent Application Publication 2004/0042767 A1 (Defrance et al.) teaches transmission of MPEG-2 data or DV data over an IEEE 1394 bus. Japanese Patent Application Publication 2001—94552 A (Morinaga) discloses the claimed invention, but is not considered "prior art" under any section of 35 U.S.C. 102.
